

we:boost

WEBOOST PRODUCTS SUPPORT THE LATEST IN 5G TECHNOLOGY.

RAISE THE BAR ON FLEET CONNECTIVITY.

With its enhanced uplink-output power, Drive Reach Fleet is capable of getting cell signal on even the most remote highways.

The **Drive Reach Fleet** by weBoost, our most powerful, multi-user cell signal booster yet. Made to optimize vehicle tracking capability and enhance driver communication throughout a fleet.

With a game-changing 29.5 dBm in uplink-output power, weBoost's Drive Reach Fleet delivers the strongest cell signal possible on all available network speeds. Both drivers and passengers experience fewer dropped calls, an increased calling range, and faster internet connectivity. Drive Reach Fleet also allows dispatchers and fleet managers to stay in contact in weak-signal areas. Uses a high-performance NMO antenna which **REQUIRES PROFESSIONAL INSTALLATION**.

Drive Reach Fleet is compatible with all cell phones, hotspots, cellular-connected tablets, and other cell devices on all US mobile carriers—including Verizon, AT&T, T-Mobile, UScellular and more.

DRIVE REACH FLEET

470254

Key Features

As our most powerful booster, Drive Reach Fleet is designed to keep fleet drivers and dispatchers connected when it matters most.

Sleek metallic red exterior with a unique fin design for added surface area; allowing it to displace excess heat and sustain peak performance.

Custom mounting bracket for ease of installation; with Velcro-backing to provide secure placement on the floor underneath any vehicle's driver's seat.

Paired with an omni-directional NMO Antenna; permanently mounted to offer both durability and optimal cell signal coverage.
